

4B. Utilities and Public Services

Existing Water Treatment and Conveyance Infrastructure

Sanitary Sewer

The Project would replace the existing sanitary sewer conveyance infrastructure. The principal means of treatment for wastewater is expected to be conveyance to the Sonoma Valley County Sanitation District (SVCSD). A connection to a to-be-developed private tertiary treatment plant which could be located east of the core campus on the site of the now-abandoned SDC treatment facility is under consideration as a supplementary form of treatment.

Public Service Providers

- **Water Supply and Conveyance:** Valley of the Moon Water District
- **Sanitary Sewer:** Sonoma Valley County Sanitation District
- **Stormwater Management:** Sonoma County
- **Energy:** Pacific Gas & Electric or Sonoma Clean Power
- **Waste:** Recology Sonoma-Marin
- **Police:** Sonoma County Sheriff Office
- **Fire:** Sonoma Valley Fire District

Water Supply and Conveyance

- The Project would utilize a public water system under the regulatory authority of the State Water Resources Control Board.
- The Project would repair or replace the existing water treatment plant and repair and reconstruct the off-campus and on-campus distribution system.
- The Project would utilize the SDC self-contained water system that consists of lakes, natural springs, wells, a raw water and potable water distribution system, a water treatment plant, treated water storage, and surface water reservoirs.
